# Q-Touch module

Easily switch and dimming with the capacitive Q-Touch module.

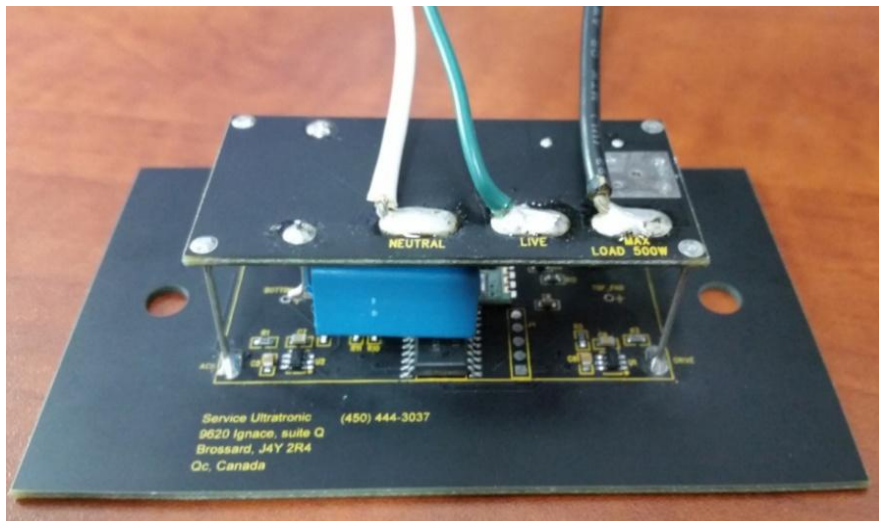

## In the operation mode

upper button is used for **ON** switch or increment level dimmer.

Lower button is used for **OFF** switch or decrement level dimmer.

## Plug in

Three connections on the piggy-back: Neutral, Live and Load.

**Neutral** need to be connected to ground.

### Configuration

Q-Touch module is configurable to be used as a simple **ON-OFF** switch or dimmer with 9 steps levels.
